## Notes

- A Physical Tokenized card does not have to be registered for it to be used as a physical card. Only when the user wants to add the card to their mobile wallet does it need to be registered.
- Steps 1-4 only need to be completed one time. Once the user has an account created, they can add/register multiple cards under that profile.
- When the card is added to the Get My Balance profile, it does not automatically add the card to the mobile wallet. The user will need to manually add the card to their wallet.
